

# Trends

## Datametrics Visualization and Real-Time Decision-Making

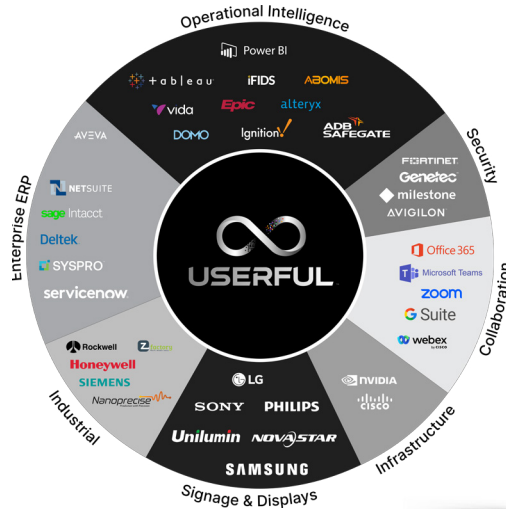

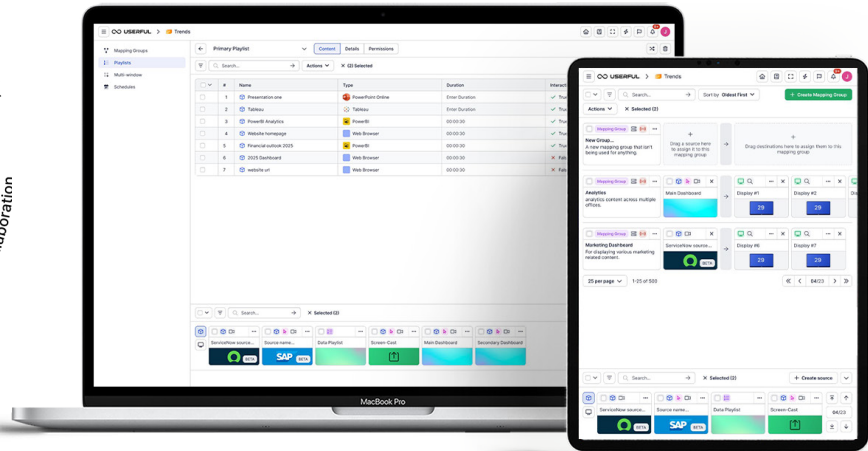

Aggregate, visualize, and distribute real-time business intelligence, ensuring instant access to critical insights for efficient decision-making. Whether deployed in manufacturing plants, industrial operations centers, financial hubs, or global control rooms, Trends delivers actionable insights where it matters most. With native integrations embedded directly into your enterprise tech stack, Trends offers secure, adaptive authentication mechanisms that ensure data integrity. Leading integrations in Useful Infinity include PowerBI, Tableau, ServiceNow, Epic and Domo. Learn more about Useful's integration capabilities [here](#).

### Benefits

<b>Faster Decision-Making</b>	Provides real-time intelligence, allowing teams to act quickly on insights while reducing manual workloads through automation.
<b>Better Situational Awareness</b>	Enhances visibility across multiple data sources, enabling teams to monitor performance metrics and KPIs in real time.
<b>Seamless Collaboration</b>	Keeps teams aligned by delivering synchronized insights across locations, whether in-office, remote, or hybrid work environments.
<b>Enterprise-Grade Security</b>	Built with adaptive authentication mechanisms and zero local data storage, Trends ensures data integrity, privacy, and compliance with global security standards.
<b>Lower Operational Costs</b>	Optimizes resource utilization by reducing the need for manual intervention and reliance on inefficient data-sharing methods.

### Features

<b>Native Integrations</b>	Seamlessly integrates with BI, ERP, and ITSM platforms, embedding real-time data directly into your enterprise workflow for centralized decision-making.
<b>Real-Time Data Interaction</b>	Enables users to interact with live dashboards, ensuring up-to-the-second accuracy without delays or refresh interruptions.
<b>Easy-to use Interface</b>	Add data visualizations across various endpoints through drag-and drop.
<b>Multi-Window View</b>	Display multiple dashboards from BI/ERP tools and other business data sources on a single screen separated by grids enabling teams to compare insights, monitor KPIs, and enhance situational awareness in complex environments.
<b>Playlists &amp; Scheduling</b>	Automate dashboard rotation with custom playlists and scheduling, ensuring that the right insights are delivered at the right time without manual intervention.
<b>Stream Content to Remote Teams</b>	Convert your business intelligence into an HLS stream for remote workstations, offices, and global teams, ensuring seamless collaboration and alignment.
