

# uConduct

## Advanced workstation application for control room operators

uConduct is a software-based solution that enables control room operators to interact with sources from Decisions, Trends, and Engage, in real-time. uConduct facilitates rapid response and efficient management of critical information by aggregating interactive sources into a unified interface. Its browser-based architecture eliminates additional hardware and incorporates Role-Based Access Control (RBAC) for enhanced security.

## Benefits

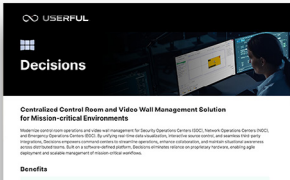

<b>Simplified Content Management</b>	Enable operators to interact with multiple sources, including remote systems, from a single interface using a keyboard and a mouse, streamlining workflows.
<b>Low Ownership Cost</b>	Eliminate costs associated with purchasing, deploying, and maintaining proprietary hardware.
<b>Integration With Decisions</b>	Launch uConduct in a single click from Decisions enhancing operator efficiency.
<b>Customizable Configuration</b>	Use workspaces to group and store sources based on operational needs to help operators adapt to dynamic environments.
<b>Web-Based Access</b>	Access uConduct directly through web browsers without additional software installations.

## Features

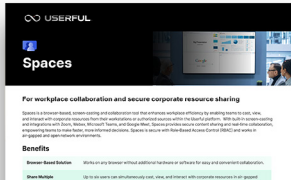

<b>Soft-KVM Functionality</b>	Interact with multiple sources using a single keyboard and mouse at the operator workstation. Control remote desktops, virtual machines, and web-browser sources running on the Useful server.
<b>Manage Multiple Sources</b>	View and manage control room sources from one place. Interact with sources in separate tabs, hide sources temporarily, and lock sources in position.
<b>User-Friendly Interface</b>	Scroll across sources, zoom in and out, drag and move sources, and interact with sources using the interactive viewer.
<b>High-Quality Visuals</b>	Provides up to 4K resolution for sharp and detailed visuals for enhanced clarity in critical monitoring scenarios.
<b>Real-Time Interaction</b>	Delivers visuals with an interaction latency of less than 100 milliseconds, enabling timely responses in real-time applications.

## Unlock the Full Potential of Useful's Platform

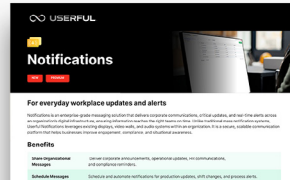

Explore how the Infinity Platform and its applications can redefine the management and connectivity of large-scale enterprise operations.
