

uControl

NEW

PREMIUM

Instant resource switching for visual environments

uControl is a premium control interface designed for instant adjustments and command over an organization's visual environments. Whether in a command center, boardroom, or operations hub, it empowers leaders and operators to override, switch, and reconfigure displays across multiple locations with a single touch, ensuring critical operational metrics appear exactly when and where they're needed. With an intuitive, touch-optimized interface, leaders gain independent control, while operators manage workflows efficiently.

Benefits

Intuitive Control	A streamlined, user-friendly interface that enables leaders and operators to manage real-time updates with ease.
One-touch Execution	Instantly override and adjust displays, ensuring critical updates are made without delays or disruptions.
Situational Awareness	Gain full control over videowalls, workstations, and operational views with a single touch, ensuring teams always see the most relevant information.
Enterprise-wide Synchronization	Maintain consistent visibility across teams and locations, enabling faster, more informed decision-making.
Device-agnostic	A responsive interface that works across tablets, touchscreens, and browser-based devices, eliminating the need for dedicated workstations.

Features

Touch-optimized Interface	Designed for effortless navigation, with visually distinct buttons that enable quick and precise control with a single touch.
Preset Management	Create, activate, and manage a variety of presets to enable fast, effortless display adjustments across the enterprise.
Instant Environment Switching	Enable one-touch adjustments to seamlessly change displays and layouts in any location, allowing for rapid transitions across the organization.
Role-based Access	Ensure secure operations by granting customized access, allowing only authorized users to activate or create presets while maintaining system integrity.
Playback Control And Auto-restore	Easily assign, remove, or override content to displays using uControl. When content presets are deactivated, displays automatically return to their original state, ensuring uninterrupted workflows.

Preset types: The power of uControl

uControl operates through three intelligent preset types, enabling both leaders and operators to take full control of source management with one-touch execution.

1. Custom Preset

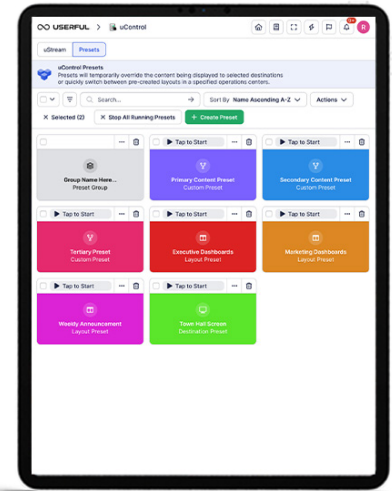

- Temporarily override and assign sources across multiple destinations.
- Ideal for enterprise-wide updates, emergency messaging, or executive-level interventions.
- Auto-restores previous sources when deactivated.

2. Destination Preset

- Expands existing source distribution across additional screens.
- Used for multi-room synchronization, enterprise-wide coordination, and large-scale updates.
- Remains active until manually adjusted in the respective application.

3. Layout Preset

- Redefines how sources are displayed, ensuring key information is prioritized.
- Essential for crisis response, control room workflows, and adaptive workspaces.
- Cannot be deactivated—adjustments must be made in the Decisions application.

Supported Software Version: Infinity v12.7 and above

In 2025, uControl will be available to all customers as part of the standard offering. However, starting in 2026, access to uControl will require a premium license subscription to enable this feature.
